

UV Money Detector

KK-18

Overview:

This unit uses single UV fluorescent lamp to illuminate currency from above, to clearly see any uv reactive threading or seals. This is a reliable and economical tool for verifying authentic currency, credit cards, travelers checks, ID's and drivers licenses. The Electronic Money Detector uses common security features to light up under the UV light. Can also be used to verify hand stamps, or any other items printed with a UV sensitive ink.

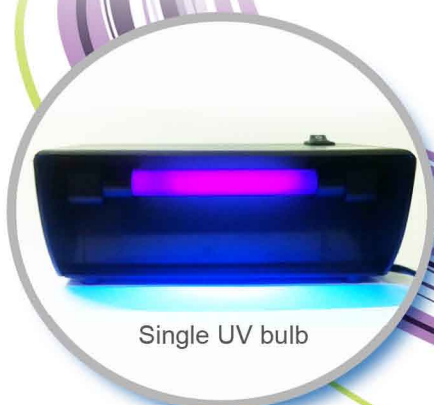

Able to verify Currency, Passport, Credit Card, I.D. Card and other Legal documents.

Specifications:
